

*Press Release*

## **Ten Most Corrupted Government Institutions and/or Ministries**

The President, SBY, has been committed to extirpate the corruption in the government he leads. Unfortunately, the commitment was only his lip service to establish his good image in the eyes of his people. To this extent, SBY's leadership has been failed to eliminate the state's lost due to the irresponsible use of the state's budget by the officials of the government ministries and/or institutions (M/I).

The analysis of National Secretary of FITRA on the results of the state budget's examination that was conducted by the state's financial supervisory institution (BPK RI) towards the budget's management in 83 M/I during the period 2008 to 2010, has shown the presence of 16.4 trillion rupiahs in the state's budget have gone with 5,870 cases of potential losses for the state. It has been happening because these government bodies did not take account of their use of the state's budget in accordance with the BPK RI recommendations for further action by returning the state's assets and funds to the state's treasury.

These findings indicated the existence of the misuse of the state's budget, and that could also means there are potential corruption within the use of the state's budget by the people in the government bodies under SBY's leadership. SBY government does not have the "political will" to extirpate the corruption on the state's budget. The extirpating of corruption on the state's budget was just his jargon for his personal image alone ...!

Out of 83 M / I, the National Secretary of FITRA has ranked 10 M / I that were potentially the most corrupted in using the state's budget between 2008-2010, are:

1 Kejaksaan Republik Indonesia 5.433.690 2 Kementerian Keuangan 5.359.204 3 Kementerian Pendidikan dan Kebudayaan 3.335.643 4 Kementerian Kesehatan 332.862 5 Kementerian ESDM 319.138 6 Kementerian Kehutanan 163.506 7 Kementerian Sosial 157.836 8 Kementerian Agama 119.312 9 Kementerian Pemuda dan Olahraga 115.447 10 Kementerian Komunikasi dan Informatika 102.481 *Sumber: IHPS II BPK, diolah Seknas FITRA (Dalam Juta Rupiah)*

*In order to keep away the 16.4 trillion of the state's budget - which have been paid by the people - from the potential lost by the corruption,*

*The National Secretary of FITRA then demand to:*

*1. President SBY to improve the performance of the state's finances as it is apparrently has been misused by the management of the public officials. Do not just go for vacatio abroad ...! SBY*

*should be more focus on prevent the amount of leakage of state's treasury ...!*

*2. The leakage of the state funds in the fiscal yea of 2008, 2009 and 2010, have shown that there is no political will by SBY government in the combat against corruption, and the combat to extirpate*

*Corruption has become just a jargon for the image of SBY's government alone ...!*

*3. The Monitoring Rights by the parliament (DPR) towards the budget's realization in*

*ministries / state's institutions, so that leakage can be minimized. All this time,*

*the public people has been disappointed because the Parliament uses its supervisory Rights as a barter so that the Parliament can asked for their program's "benefit" or budget to the Executive ...! So that the function of "supervising" has been replaced with materials and budgets that caused to the unavoding leakage of the budget.*
